

01

Hacking

Unauthorized access to computer systems, networks, or devices to steal data, disrupt operations, or compromise security.

Swipe

02

Malware

Malicious software designed to harm or infiltrate computer systems, including viruses, worms, Trojans, spyware, and ransomware.

Swipe

03

Identity Theft

Illegally obtaining and using someone's personal information to commit fraud, often for financial gain.

Swipe

DDOS ATTACK

04

Distributed Denial of Service (DDoS) Attacks

Overloading a website or network with traffic to make it unavailable to users.

Swipe

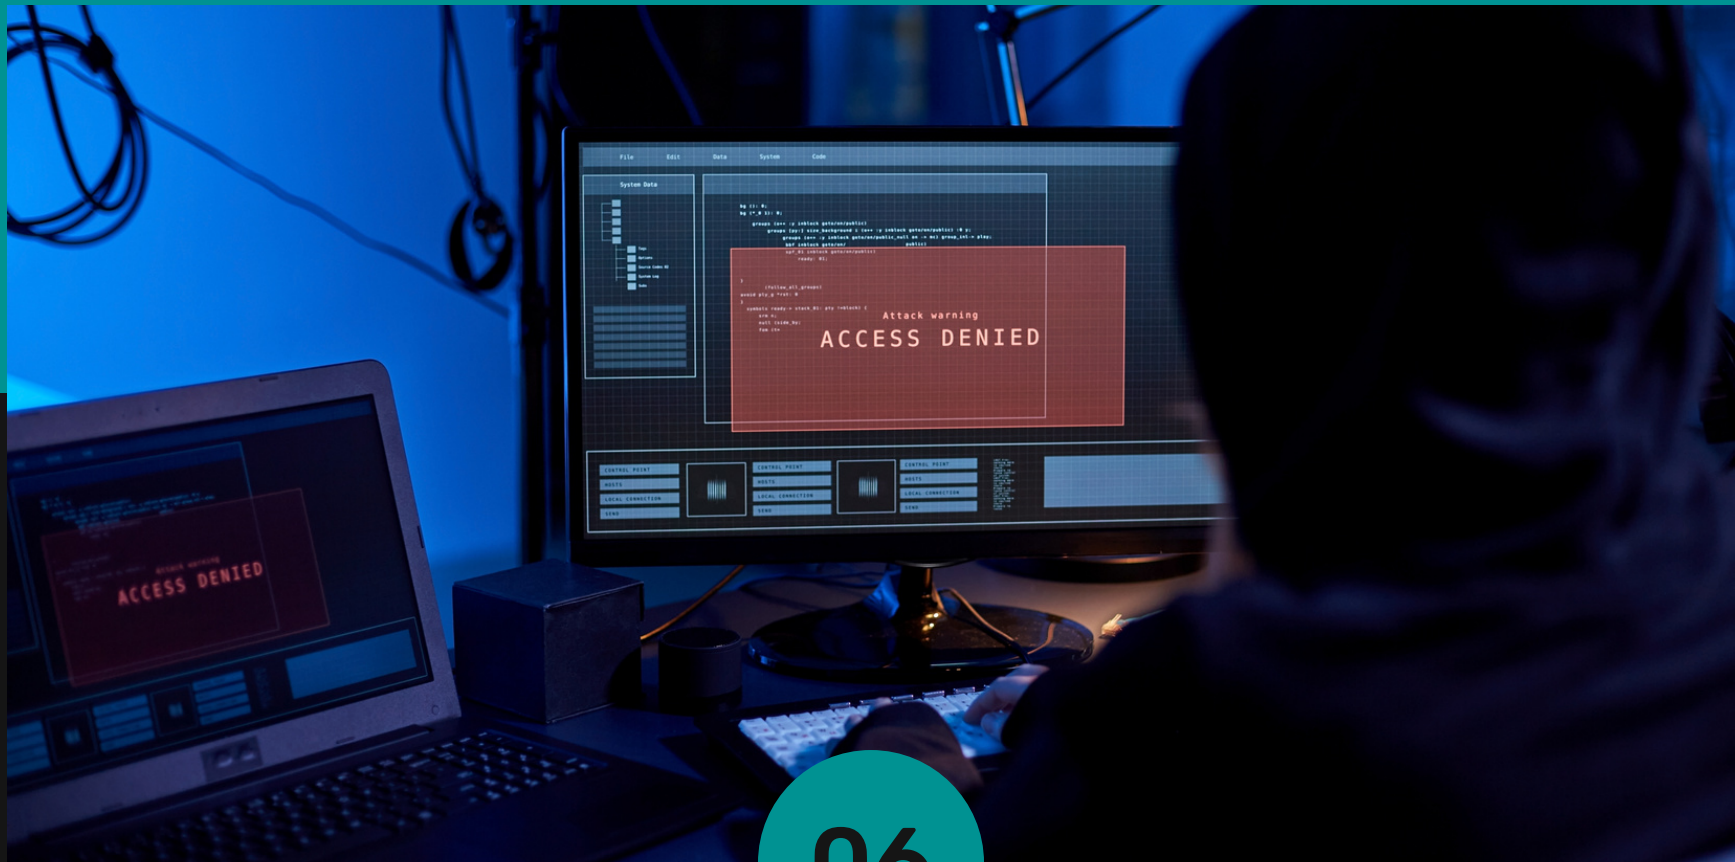

05

Cyber bullying

Harassment, threats, or defamation carried out online, often through social media, messaging apps, or emails.

Swipe

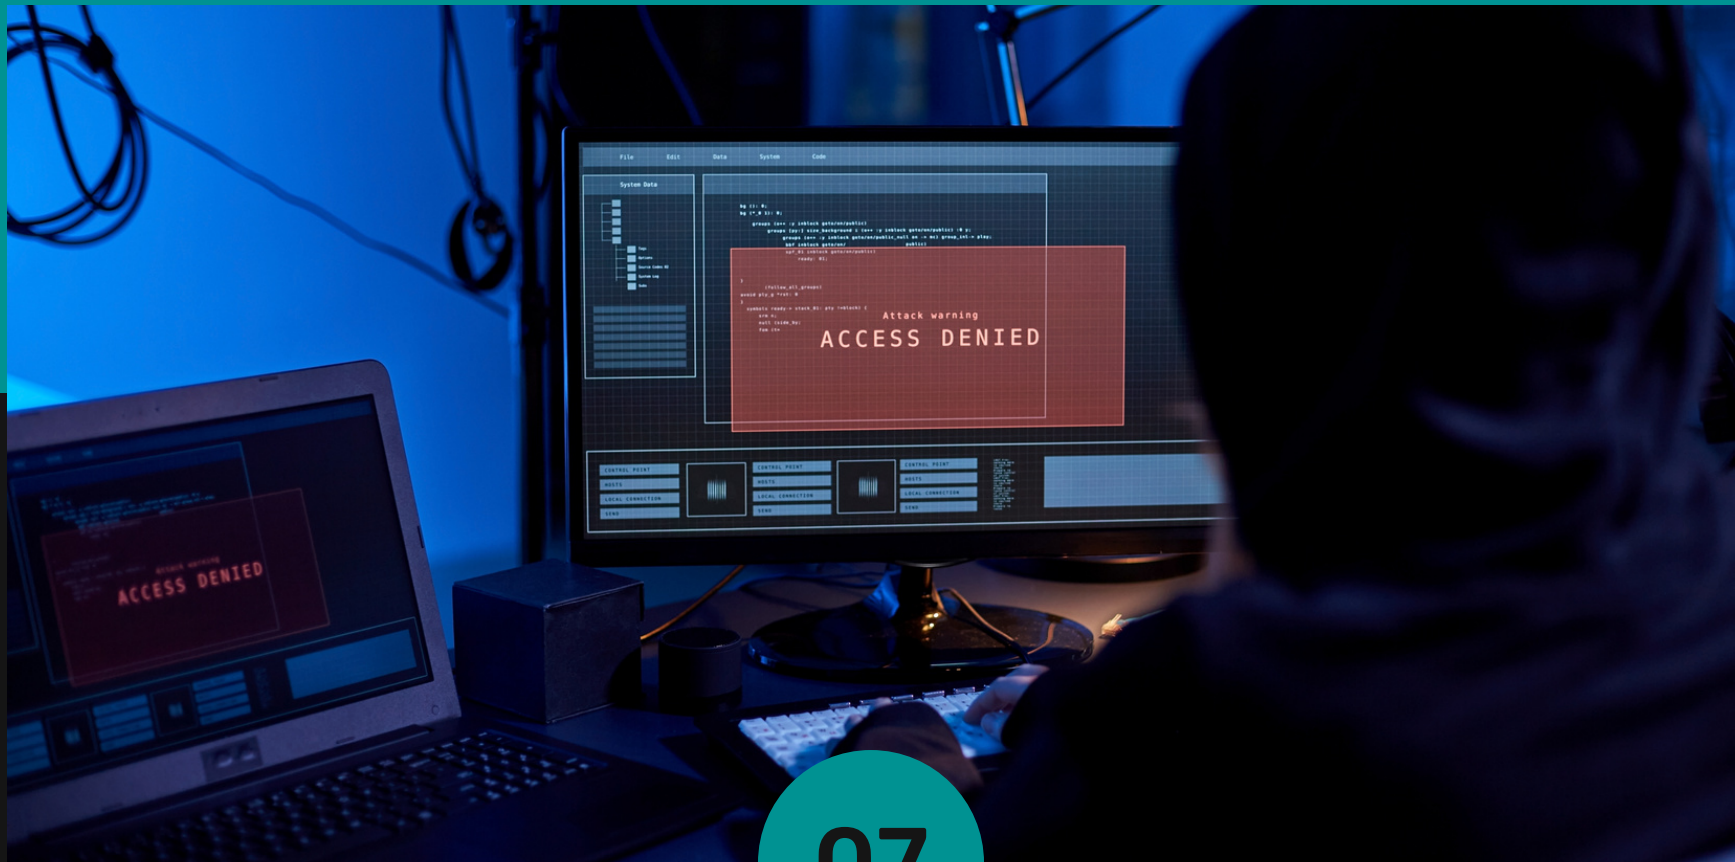

06

Cyberterrorism:

Coordinated cyberattacks with political or ideological motivations that aim to disrupt critical infrastructure, government systems, or communication networks.

Swipe

07

IoT (Internet of Things) Attacks

Exploiting vulnerabilities in internet-connected devices, such as smart home appliances, to gain control or steal data.
